VEOS

WOWVISION

Life is a Presentation
present yourself well

Enjoy greater flexibility and effortless collaboration with wireless shared access.

Collaboration. It's all about combining technology to open up new possibilities.

Experience VEOS, the convergence of Cloud AV and IT excellence to bring a stunning new communication medium to the world. A state-of-the-art presentation tool; changing the way people connect, present and collaborate.

Fast growing industries and their need for more intuitive and engaging communication tools are becoming a global trend, with new shifts in operational methods demanding a richer, interactive and more collaborative experience.

The VEOS and its full suite of collaborative features is the answer to the lack of simplicity between multiple traditional devices previously required to facilitate efficient and meaningful communication, providing a future-proof solution that grows with the dynamism of the market.

Combining the best in hardware technology and the power of Cloud AV to bring users a highly reliable and productive collaboration tool, the VEOS is a one-stop intuitive bridge between multiple parties, devices and shared displays, allowing users to wirelessly interact, share, and present their thoughts.

Users can take this platform compatibility further and creatively collaborate across a myriad of personal devices (iPhone, iPad) and between operating systems (Windows, Mac OS), creating unique environments for high quality presentations and boardroom discussions.

Through an extensive combination of both core and value-added functions combined, the VEOS gives users a truly collaborative experience.

Unique to the Veos is the Presentation Management System (PMS), a special feature allowing secure administrative control of user access, action and participant customization.

The foundation of the highly performing VEOS consists of core features such as the seamless transfer of high quality content between users and displays, HD/YouTube live video streaming, auto aspect-ratio scaling, instant switching between users, quad display support, instant messaging, e-whiteboard, audience polling, e-exams, and file sharing with highly encrypted security.

VEOS FOR THE FUTURE

The VEOS today advocates a highly functional and usable interface. With a constantly increasing suite of collaborative apps catering to the needs of different industries, it is quickly establishing itself as a powerful and indispensable tool for outstanding collaborative excellence.

EDUCATION

Leverage on the VEOS to transform traditional classrooms from a teacher to student centric model to create a highly conducive, exciting and creative environment for learning.

Students can effortlessly display their presentations; teachers can maintain classroom discipline with the Classroom Management System (CMS), and encourage creative discussions by utilizing the electronic whiteboard and collaborative QnA features.

Turn your presentations and traditional meetings into creative boardroom experiences and enjoy greater productivity and efficiency in your corporate enterprise.

Local speakers and foreign delegates can enjoy zero setup time connecting to the presentation system; overall quality of presentations can be improved with the available suite of collaborative features, and audience opinions engaged and discussed through intuitive electronic polls and surveys.

The proVEOS, powered with the best in hardware and software technology, brings you the full suite of collaborative features all at once.

Uniquely engineered to incorporate a built-in server, the proVEOS is suitable for boardroom applications where an existing network may not be required or available. Enterprises can experience the power of Veos and unleash the true potential of their business, experiencing quantum leaps in operational efficiency.

KEY FEATURES

Wireless Presentation: This feature allows a presenter to send their desktop image to a display projector without the need for a VGA cable. We can move seamlessly from one presenter to the next allowing you to get more done and to keep the rest of the class engaged.

Wireless Presentation

YouTube Video Streaming: We know how important it is to be compatible with the world's number one video streaming site, so we have made sure you can play YouTube videos directly on a room projector or display.

YouTube™ Video Streaming

Quad display support: Unique to VEOS, up to 4 presenters can display simultaneously to the common display. This gives you, the teacher, a greater scope of lesson planning and teaching tools at your disposal.

Quad display support

Apple MAC Support: Students of today have an ever growing variety of hardware which needs to be compatible with the classroom technology. VEOS has made sure that no one is left out by allowing Apple MAC users to participate in presentations.

Apple/MAC Support

Allow/deny display: Any participant can be denied the ability to display from their laptop to the group to prevent unsuitable content.

Allow/deny display

Asset Management: This can be utilised with a web browser allowing users to control multiple displays from a central location.

Asset management

Digital Signage/Live TV: Digital signage within campus is an invaluable way of distributing information, news and bringing it to life for your staff and students. With VEOS, any display can be converted into a centrally managed electronic display that not only shows information but can include live television broadcast.

Digital signage/Live TV

Emergency messaging: In the event of an emergency, messages can be broadcast to all displays simultaneously in a few seconds.

Emergency messaging
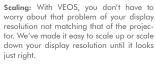

Live video streaming: Another benefit of the wireless presentation is that the presenter can stream a video file from their PC to the projector –again so easy to do, no cables or movement involved, just click and play, giving each student equal access to the projector. Of course, this is going to work just as well over a wired network.

Live Video Streaming

Scaling: With VEOS, you don't have to worry about that problem of your display resolution not matching that of the projector. We've made it easy to scale up or scale down your display resolution until it looks just right.

Scaling

Q&A - Instant Messaging: Interaction between you and your students is the name of the game if you want to keep their attention and make sure the information goes in and stays in! VEOS has a built in IM feature which allows all participants to communicate by simple text messaging.

Instant messaging

Security High Encryption: Of course, we understand that there are security issues to be considered which is why VEOS boasts an encrypted (1024 bit key) presentation between presenter and display. That means your private files are protected from unwanted traffic.

Security High Encryption

Lock participants: This feature allows the teacher to lock any participants display/screen either when they are presenting or to force them to pay attention to a presentation.

Lock participants

Presentation Recording: An invaluable resource for teachers is to record the presentation in real time to use for remote learning, teacher training and absentee students.

Presentation Recording

e-Notice Board: This feature allows information to be sent immediately from a central location to all displays or dedicated displays – whether it is emergency news or general information, this easy method of distribution gets the message across quickly and effectively, straight in front of the students.

e-Notice board

HD Live Video Streaming: If you are concerned that HD files are not going to work, then no need – VEOS enables each presenter to stream a High Def video file up to 1080p to the projector – no quality lost and no time wasted.

HD Live Video Streaming

Easy switching between users: At WOW we understand that the flow of your lesson does not need to be interrupted whilst you get all technical with cables and switchers, so we have made it so easy to switch between presenters. Just one click will do it.

Easy switching between users

e-Whiteboard: We are all familiar with the benefits of electronic whiteboards in the classroom environment and how they enhance discussions and demonstrations. With the VEOS system, multiple users can participate in an e-Whiteboard session, using their own PC as the whiteboard and projecting to a central display.

e-Whiteboard

File Sharing: An instantaneous method of sharing lesson content or student input, the file sharing feature means that any content or multimedia files can be sent, received and downloaded before the presentation finishes and more importantly, before the students leave the room.

File Sharing

Audience Response: Involvement and interaction of students with the presentation subject can be enhanced by feedback responses. Whether a simple Q&A format, pooling, voting, games – VEOS facilitates an easy way to do this, fitting seamlessly into your presentation.

Audience response

SMS Notification: If you need the support team in the event that a display device is not working, VEOS allows you to send a simple SMS message (or email) directly to the support team who can then view your system remotely to fix that problem.

SMS Notification

Device Control: An authorised person can control VEOS either on site or remotely. Control can be integrated into your existing operations room allowing your IT department to gain their green credentials and ensure that no systems are on when they don't need to be.

Device Control

Security and Control *Group presentations* *VPN support* *Unlimited users* *Unlimited users*

SPECIFICATIONS

Housing Material	Type: 2.0 mm Aluminium
Processor	2.26 GHz Ultra Low Power Consumption
Main Memory	2 GB High Speed
Graphics	DVI-I x 1, HDMI x 1, (VGA: DVI to VGA converter provided)
Storage	500 GB
LAN	Integrated Gigabit LAN Controller
Audio	Integrated High Definition Audio 7.1 Channel
USB	USB 2.0 Port x 4
Power Supply	135W Power Adapter (19V, 7.11A) x 1
Input Voltage	AC 100V~220V 50/60Hz Auto sensing
Net Weight	2.48 kg
Volume	2.6 L
Dimension/Size W x H x D	190 mm x 70 mm x 200 mm
Back Panel I/O Port	AC Adapter Connector x1, HDMI 1.3 x 1, DVI Port x 1, USB 2.0 Port x 4, RJ45 LAN Port x 1, Line-In / SPDIF-In x 1, Speaker-Out x 1, MIC-In x 1, Center /Subwoofer x 1, Rear Surround / SPDIF-Out x 1, Serial RS 232 x 1,Side Surround x 1
Mounting Accessory	VESA Mounting Kit
Accessory	Power Cord x 1, DVI-to-VGA converter x 1, S/PDIF Converter x 1, proVEOS DVD (system installation) disc x 1, Easy Installation Guide CD x 1
Shipping Weight	3.65 kg
Packaging Dimension	352 mm x 262 mm x 113 mm
